DIARY NOTES

A-DD/S

Friday, 27 December 1963

25X1A9a 1. At the Executive Committee Meeting this morning, General Carter read some statistics from Emmett Echols' report on recreational activities and said that he was "very impressed" with the progress that has been made in the last couple of years. He noted that NSA had been able to provide a gymnasium, bowling alley, etc., through their Recreation Association and asked for a report on how they had accomplished this. (After the meeting I asked [REDACTED] to work up a statement about how these activities were financed at NSA.)

25X1X4

25X1A9a 3. [REDACTED] reported that the program recommended by the Office of Security for closing guard posts as an economy move had a number of minor errors in it and he was also running into some objections from operating components. We agreed that this should be totally coordinated and all objections carefully weighed before anything was published. This will take a few more days than we expected.
